Floating Diya

Earthen pots break easily, gets really hot and is non bio-degradable. But cork is durable, heat resistant and carbon negative, also it is light weight and water resistant, allowing it to float on water.

DI25

Nature wastes nothing, it just completes the circle. Unfortunately, many human designs have failed to do so. While developing these incense sticks, we kept nature's principle in mind and utilized only the waste flowers from temples as the raw material. These, otherwise, would be discarded, polluting the water bodies.

21 incense sticks packed in a recycled paper tube.
